

Find out the no limits
convenience.
**Control your curtains
from the couch.**

MOTTURA
SOLUZIONI ALLA LUCE DEL SOLE

Today's technologies give us **limitless** control.

Today, controlling blinds in your home or office in a comfortable way, is easier than ever. There are a lot of solutions on the market, all created to allow you to manage the light and privacy of your rooms with easyness and relax.

Comparing radio, Bluetooth and Wi-Fi.

MANAGEMENT BY REMOTE CONTROL

It is the "old but gold" **radio technology**, that allows you to control your blinds with a simple remote control. It's a solution that many Mottura customers have already chosen, and it's just as easy to use as a TV remote control

MANAGEMENT BY SMARTPHONE

Bluetooth technology, the smartest way to control your curtains, is like an electronic "whisper," enabling devices to communicate with each other. It's the best way to control curtains via smartphone, in close proximity. It is a practical and convenient solution.

REMOTE MANAGEMENT

Wi-Fi technology it's the right choice for those who need to control their blinds while away from home - whether on vacation or a business trip. It still works via smartphone and is the perfect solution for anyone who wants total control over their rooms, no matter where in the world they are (as long as there's coverage!).

Mottura's curtain control.

Building on all these technologies, we have developed a convenient and simple solution to offer you an autonomous, versatile, and comfortable way to manage your blinds.

Whether you already have **Mottura** blinds in your home, office, yacht, or hotel - or are about to choose our next-generation products - imagine being able to control them in every room with just a touch on your smartphone, without any physical contact or effort.

Welcome to the future of comfort.

A smart home for a **simpler life.**

How to design your **spaces**?

The smart curtains are transforming
the marketplace

Choose the perfect
one for you!

ELEGANCE AND FUNCTIONALITY, WITHOUT COMPROMISE

Mottura's motorized blinds are available in a wide range of models and finishes to perfectly fit any space. From the dining room to the bedroom, from the office to the sunroom, you'll always enjoy the ultimate in design and technology.

ASK TO A MOTTURA POINT FOR AN EASY INSTALLATION

No invasive work, no stress. Our **Mottura Points** will provide all the assistance you need, letting you enjoy your smart home. Always.

Discover the freedom
of **smart control** and
be seduced by its
convenience.

The Mottura's new app.

easyMoT is Mottura's new app, and we're very proud of it. It's designed to manage curtains easily and intuitively. The app is simple to install and compatible with both previous and new generations of motorized blinds, as long as they are equipped with Mottura support stations.

THROUGH THE USER AREA, YOU CAN MANAGE EVERYTHING IN TOTAL AUTONOMY:

- Manage your blinds directly from your device.
- Customize icons, rooms, and blind types to make them easier to recognize.
- Receive information about the operating status of your blinds, so you'll know if everything is working properly.
- Create and manage groups of blinds, allowing you to control them all at once with a single command.

NB.

In case of previous version curtains and you do not have integrated the latest technology, you can still use easyMoT with the help of a small control station (M2Net Station): flip to page 8 for more.

WITH THE HELP OF AN INSTALLER, OR WHEN YOU BECOME AN EXPERIENCED USER, YOU CAN ALSO:

- Customize advanced curtain system settings to optimize their performance.
- Easily define and manage zones or homes of interest.
- Access blind and M2Net Station configurations manually or via QR code.
- Configure and verify curtain systems to ensure proper operation.
- Connect blinds to the M2Net Cloud to enable remote control and access advanced features.

Connecting the past and the future without effort

Here is the new **M2Net Station!**

Here at **Mottura**, offering you the best Sunlight Solutions is truly our mission - even if you're not planning to upgrade to newer models!

That's why we've created a super-easy system that lets you manage even your existing motorized blinds through the **easyMoT app**. All you need to do is add a small control unit in your home called the **M2Net Station**. This innovative device connects your Mottura systems to your smartphone via Bluetooth and Wi-Fi, using radio technology.

WITH THIS SMALL STATION, YOU WILL BE ABLE TO:

- Use our easyMoT app for simple and intuitive blind management.
- Control up to 5 blinds with ease and convenience.
- Enjoy an essential, minimalist, unobtrusive, and wire-free design.
- Place or hide it wherever you like, thanks to its compact size (65 × 40 × 65 mm).
- Power it in a practical and modern way via a USB-C cable — the latest European standard.
- Take advantage of Bluetooth 5 connectivity with Low Energy technology for efficient, low-power communication.
- Connect to 2.4GHz Wi-Fi, the most widely supported frequency band.
- Check the status of Wi-Fi communication and Bluetooth connection thanks to its truly intuitive LED signaling system.
- Take advantage of the geolocation capability, to adapt the tent to the current weather conditions and optimize its operation.

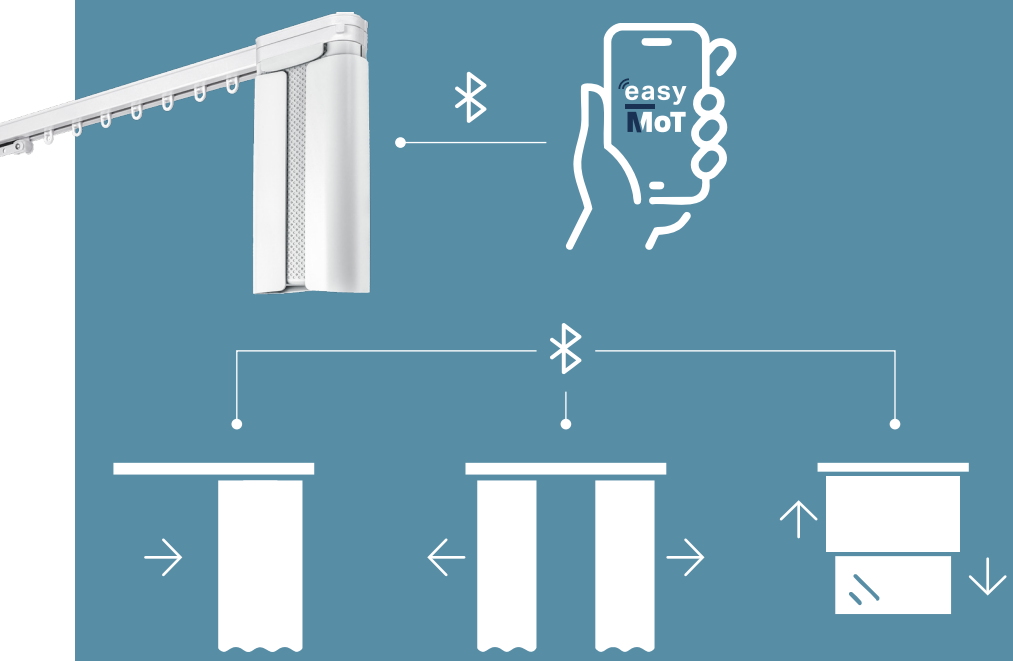

If all this sounds too technical for you, don't worry! You can turn to your Mottura Point dealer.

What you just need to know is that this control station is nothing more than a device that helps you control the blinds in your house automatically and conveniently.

SUMMING UP, HERE ARE THE TWO POSSIBLE SCENARIOS TO BE ABLE TO enjoy **Mottura's** products in a connected way.

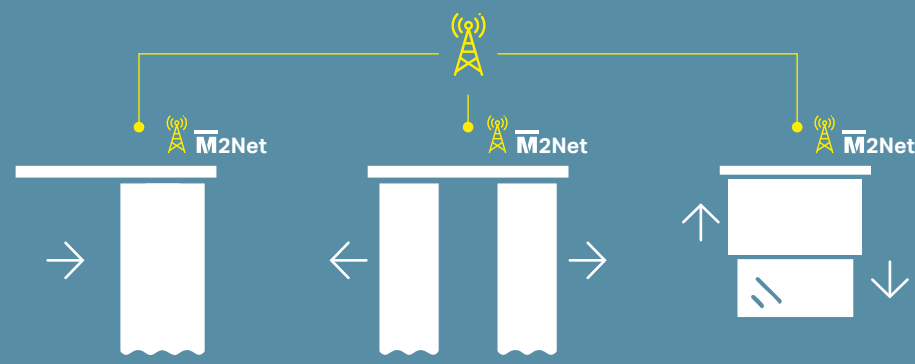

FOR THOSE WHO BUY NEW MOTORS

CURTAINS NEW VERSION
Local communication from easyMoT app

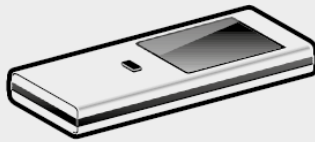

FOR THOSE WHO WANT TO CONNECT PREVIOUS MOTORS

M2NET STATION
Local management from easyMoT app

When ideas are clear, innovation is **simple**.

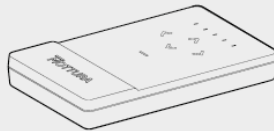

5459B

M2Net - 99-channel touch screen transmitter

Remote control capable of managing up to 99 blinds, with the ability to create simultaneous control and management groups for custom scenarios. Sold with wireless charging included.

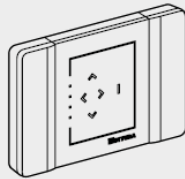

5474B

M2Net - Touch transmitter 1-4 systems white

Remote control that controls up to 4 blinds, singly or in groups.

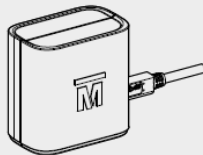

5484B

M2Net - Touch wall transmitter 4 systems white removable

Wall transmitter similar to remote control that controls up to 4 blinds.

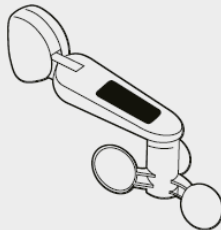

5452

M2Net - Station Bluetooth & IoT

Control station that makes all 'previous generation' awning motors smart and manageable via app.

5120
